

Toronto, April 21, 2025

To Whom it may concern,

It is my pleasure to recommend Hanyin (Tango) Tan, who served as a programmer on their Capstone project for the Honours Bachelor of Game Design program at Sheridan College. I had the opportunity and privilege to act as the Industry Advisor for their team during the fall term 2025 and quickly recognized both Tango and his team as having exceptional potential.

Throughout the project, Tango demonstrated a strong work ethic, communication skills, teamwork, and a strong commitment to improving as a programmer. Over the course of the winter term, Tango continued to grow, contributing meaningfully to a project that ultimately received two Honorable Mentions at the LevelUp Showcase for both Technical and Artistic Achievement.

Anyone looking to hire Tango will be fortunate to gain a team member who brings both talent and dedication. I have no doubt they will make valuable contributions wherever they go.

A handwritten signature in black ink, appearing to read 'Hulshof', with a stylized flourish underneath.

Sincerely,  
Eduardo Hulshof  
Partial Load Professor and Industry Advisor
